Sustainability at Crimon

Crimons is a company committed to social and environmental sustainability, specialized in furniture rental. Our philosophy is based on the circular economy, offering multiple uses for the same materials and working continuously to reduce the impact of our activities on society.

EVENT FURNITURE RENTAL

Renting instead of buying

The rental model we promote contributes to a more sustainable world by allowing the same product to be reused on several occasions.

When an item becomes obsolete or does not meet the required quality standards, we recycle it (wood and iron) or donate it to non-profit organizations, helping to furnish spaces where aesthetics and maximum quality are not essential requirements.

Reducing environmental impact

The impact of the auxiliary materials used in our operations is as important as that of our furniture. For this reason, we have managed to reduce the consumption of single-use packaging by more than 50% by creating reusable protective covers made from sustainable materials.

We have proposed to completely eliminate the use of single-use packaging by 2027, following European Union guidelines.

In addition, we have a classified waste collection system: plastics, cardboard and glass.

Biosphere Certification

We have the Biosphere certification, a voluntary and independent certification system for sustainable tourism based on the principles of sustainability and continuous improvement of the Biosphere methodology.

Currently, we are in the process of obtaining other certifications that further recognize our commitment to sustainability.

Eventsost Certification

We hold the Eventsost Certification, a recognition that endorses the organization of responsible and sustainable events based on environmental, social, and economic criteria.

This certification ensures the implementation of best practices in event planning and execution, promoting the reduction of environmental impact and the generation of positive value for the community. In addition, we continue working on the implementation of new initiatives that strengthen our commitment to sustainability in the events sector.

Collaborations

At Crimons, we actively and continuously collaborate with two social entities, FIT and ASSIS, supporting their initiatives and projects. We also maintain specific collaborations with other leading foundations such as Aprocor and the Vicente Ferrer Foundation, thereby contributing to various social and charitable causes.

Collaborations

Here are some of our most notable collaborations:

- FIT: Association constituted by Caritas, which is dedicated to train and employ people at risk of social exclusion. We collaborate with the cession of furniture.
- ASSIS: Social entity focused on improving the welfare and quality of life of people in a situation of senselessness. We collaborate annually in the Solidarity Soup to raise funds.
- Vicente Ferrer Foundation: This foundation works to change the future of children in India. We collaborate in the event “VIU L’ÍNDIA”, aimed at companies to raise funds.
- APROCOR: Organization dedicated to improving the quality of life of people with intellectual disabilities and their families, promoting a model of inclusive society.

ECO products

At Crimons, we are committed to a more responsible and sustainable model, which is why we offer a selection of eco products that respect the environment and promote more conscious consumption. These products are made from sustainable materials and responsible processes, helping to reduce environmental impact without compromising the quality, design, and functionality that define Crimons. In this way, we work to provide solutions that not only meet our clients' needs but also add value to the environment and society.

Recovery Armchair and Canalé Chair

At Grimons, we offer a range of ecological and recycled products, including the Recovery Chair and the Canalé Chairs.

The Recovery Armchair is made from recycled plastic waste from fertilizer dispensers. The recycling of domestic plastic requires collaboration with high-tech recycling companies, which ensures an efficient and sustainable process.

1. Light Green Ribbed Chair - 2. Blue Ribbed Chair - 3. Dark Blue Ribbed Chair - 4. Dark Green Ribbed Chair - 5. Recovery Armchair

ECO products

Our eco-friendly products focus on natural and durable materials. The wood and rope we use not only provide an authentic and timeless style, but also reflect a commitment to the planet.

Each piece is created with a balance between functionality and environmental respect in mind. We choose materials that are easily renewable and processes that reduce resource consumption, ensuring products that stand the test of time without negatively impacting nature.

Own family

At Crimons, we work with a responsible vision of our furniture's life cycle, always aiming to maximize its use and reduce environmental impact. This philosophy leads us to apply different management and maintenance criteria depending on the type of product, prioritizing reuse and waste minimization.

Own family

The furniture we purchase has a limited life span. After certain services, wear and tear can affect its quality and, in these cases, we proceed to recycle or donate the product, depending on its composition and condition.

Nevertheless, we have a category of products of our own production to which we can give practically unlimited life. Thanks to proper maintenance and the work of our workshop team, we can repair and renew these items, thus minimizing the generation of waste. In these cases, the waste generated is minimal, being 90% or 95% of the item refused.

1. Swedish High Table 60Ø – 2. Black Curved Niza Table – 3. Suecia High Table – 4. Round Rustic Table – 5. White Suecia Table – 6. Rustic Table – 7. Niza Rustic High Table – 8. Finland White Stool – 9. Finland White-Wood Table 70*70 – 10. Trestle Table
